EDUCATION

University of Illinois Urbana-Champaign(UIUC) <i>Master of Computer Science (MCS), Computer Science</i>	Aug 2025 – Dec 2026
University of California, Santa Barbara(UCSB) <i>Bachelor of Science (B.S.), Computer Science</i>	Sept 2021 – Apr 2025 GPA: 3.8/4.0

TECHINAL SKILLS

Programming Languages: Python, C/C++ , JavaScript, Java, Ren'Py, HTML5

Technologies: React Native, Expo, Figma, Flask, XCode, Twinery, Vue

Languages:Mandarin(Native), English(Fluent)

Relevant Coursework: Data Structure Algorithms, Mobile/Web App Development, Machine Learning, Computer Graphics, Computer Architecture, Compiler Technology, Problem Solving, Optimization Mathematics

WORKING EXPERIENCE

Intern, Inspur – China	June 2024 – Sep 2024
• Implemented features to process and transfer users' provided text into a specific government document genre using Rouyi Model in Java, making the app more comprehensive. • Optimized project interfaces for an intelligent Q&A model in Vue, enhancing user experience. • Helped to develop voice-based Q&A features with AI technologies, enabling seamless interaction for diverse users. • Conducted unit testing on knowledge base answers, improving system reliability.	

CODING PROJECTS

GoldTracker Mobile App	Nov. 2024
• Designed and developed Educational APP for college students to track spare spaces of their interesting classes using Figma and Expo. Contributed over 1,000 lines of code, submitted 5+ pull requests meeting strict acceptance criteria, and provided 10+ code review comments to enhance collaboration and code quality. • Integrated Google OAuth and Firebase for secure user authentication and data storage. • Improved UX by implementing a customized data-fetching feature and intuitive navigation. • Implemented core UI components like Stack Navigator, Bottom Tab Bar, and Pickers.	
SB UsedFull Mobile App	Jan. 2024
• Designed and Developed a sell-buy APP of used products for college students using React Native. • Implemented the Search Bar component in both front-end and back-end. • Incorporated with Scroll View, Card Styling, and Filters Components for intuitive user interaction.	
SmartAns Web App	Jan. 2024
• Developed a Web APP called SmartAns for students to upload files and get related answers based on Asymmetric Semantic Search using Python, CSS, and HTML. • Implemented Python for the back-end development, Cloud for data storage, Flask for standardized format of files, CSS and HTML for front-end interface. • Enhanced visual branding by designing the app logo using Illustrator and Photoshop.
